UC Santa Barbara
Associated Students

Senate Agenda 10/8
Associated Students UCSB 76th Senate

Zoom Link

Minutes/Actions recorded by: Melina Magno, Sydney Arbolado, Summer Tucker, Lili Dritz.
CALL TO ORDER by Enri Lala, Internal Vice President **at 6:38 PM.**
This meeting was called to order at PM in the Flying A Room by Internal Vice President Lala.

A) MEETING BUSINESS

"Before we begin, we call for students to acknowledge that the lands that the University of California locations were built upon were expropriated & founded upon exclusions and erasures of Indigenous people's human rights throughout California. UCSB is built on Chumash Land, specifically that of the non-federally recognized Barbareno tribe. As an association that pushes the student bodies' voices to the forefront, we should aim to make strides past just acknowledgment to those who continue to fight for their right to be recognized & respected as the original stewards of this land. I ask you all to dedicate time & care to personal education & to advocate for justice alongside Indigenous peoples."

A-1) Roll Call

Amna Chaudhry	✅ Present, ⚫ Late	Off-Campus Senator
Caleb Claro	✅ Present, ☀️ Early	College of Letters & Sciences Senator
Mia Gutierrez	⛔ Absent	On-Campus Senator
Neo Harter	⛔ Absent	Off-Campus Senator
Xander Hepburn	✅ Present, ☀️ Early	Transfer Senator
Yuchang Jiang	✅ Present, ☀️ Early	International Senator

Melanie Jones	✅ Present, ☀️ Early	College of Letters & Sciences Senator
Noah Luken	✅ Present, ☀️ Early	Off-Campus Senator
Victoria Ly	✅ Present, ☀️ Early	Off-Campus Senator
Qhawe Manala	✅ Present, ☀️ Early proxy Shows up at 8:30pm	International Senator
Vanessa Manakova	✅ Present, ☀️ Early	Off-Campus Senator
Nadine Malhis	✅ Present, 🌑 Late arrived at 6:49PM	On-Campus Senator
Olabisi Ola-Olaitan	⛔ Absent	University-Owned Off-Campus Senator
Keizo Ono	✅ Present, ☀️ Early	Off-Campus Senator
~~Suhrit Padakanti~~	~~❓ Unset~~	~~College of Engineering Senator~~
Natalia Pascher	✅ Present, ☀️ Early	Off-Campus Senator
Romi Riss	✅ Present, ☀️ Early	Off-Campus Senator
Erica Sherkin	✅ Present, ☀️ Early	Off-Campus Senator
Evan Sussman	✅ Present, ☀️ Early	Off-Campus Senator
Sohan Sunderrajan	✅ Present, ☀️ Early	College of Letters & Sciences Senator
Mira Than	✅ Present, ☀️ Early	Off-Campus Senator
CJ Toledo	✅ Present, ☀️ Early	College of Letters & Sciences Senator
Jasmine Wang	✅ Present, ☀️ Early	On-Campus Senator
Eeman Wahidullah	✅ Present, ☀️ Early	Off-Campus Senator

A-2) Excused Absences

Motion to excuse Senator Harter for the duration of the meeting.
Wahidullah - Luken
Call to question - Jiang

This motion passed at 6:41PM.

Motion to excuse Senator Chaudhry until 7:30PM.
Than - Ono
Call to question - Wahidullah
This motion passed at 6:42PM.

Motion to excuse Senator Malhis until 7:30PM.
Jiang - Ono
Call to question - Wahidullah
This motion passed at 6:42PM.

Motion to excuse Senator Sherkin for the duration of the meeting.
Manakova - Sussman
Call to question - Jones
This motion passed at 8:37PM

Motion to unanimously consent to move into item I3 Unit Reports.
Passed via unanimous consent at 8:41PM.

A-3) Acceptance of Proxies

Motion to accept Wylie Carver as proxy for Senator Manala.
Jiang - Ono
Call to question - Wahidullah
This motion passed at 6:43PM.

B) External Reports

B-1) Chancellor's Representative-
B-2) UCPD Representative-

a. UCPD Chief Matthew Bly

(6:43PM)

- Interim chief of police
- My background, UCSB alumni, graduated 2006, history major, UCPD 19 years
- Some of you worked with the chief who retired in July, in his place until we complete the search for his role
- One of the topics, present bicycle safety and enforcement campaign on campus
- Because this is a holistic and tiered response with multiple stakeholders involved, there's reps here with me this evening
- Some historical context is important to understand what led us here today

Garry MacPherson (6:45PM)

- Vice chancellor for administrative services
- I'd like to break this down into 4 different areas
- How'd we get here?
- Last 18 months, education campaign, and then Q and A
- Over last 18 months, worked regularly and thru summer with a lot more meetings with AS bikes, with vice chancellor of student affairs, his staff, UCPD, and the planning dept
- Each of those folks will rep their portion of tonight's program
- Starting off with how'd we get there
- Member of our planning staff will meet with you, and address what the meetings were
- Inviting Josh up

Josh Rohmer

- Director of capital and physical planning on campus
- Work with interim associate vice chancellor
- In office of budget and planning, responsible for long range planning and individual projects
- We were in charge of ILP
- We're focusing a lot on the portion of bike path that used to go through ILP
- ILP was funded through state funds
- Things take a long time, working on it since 2013
- Proposed solution, develop one large building that serves every different function
- We were able to acquire state and campus funds
- Close to 100 million project
- Completed April 2023
- In the planning, the site south of library, there was formally a bike path that went through that part of campus
- As the building developed and planning solidified, late in planning process, best information we had available to us at the time was that there was potential for it because it's a large scale building block, at the end of the hours between classes, there'd be a large influx of students that are exiting the building, which is what we see today
- Those would probably north out of the site, towards the library, create conflicts with bike path going east west
- In absence of more specific information, there was a safety decision that there were going to be such conflicts
- So it was decided it'd be best for it to relocate to south of the site
- That's why you need to do a loop around, which isn't dissimilar
- After 2023, we were able to have some lived experience in how students exited the building
- Didn't seem like the conflicts would be that severe
- Worked to see if it would be safe

- Looked like it'd be def functional
- Currently in process of designing extension of Pardall bike path
- Good portion of the way through it
- Project manager is 90% complete on construction drawing
- Within a month, then we'll get cost estimate
- Where we're at right now

Lala
- Would you prefer one by one or everyone wraps up their reports?

MacPherson
- Would like everyone to do their reports first
- AS bike efforts
- Issue was brought to us by AS bike comm
- When they came to admin offices and expressed concern for bike flow and crossing the path
- Started looking at this during construction phases, trying to establish best measures to take going forward
- One of those is project going forward, you'll hear later what that design looks like
- Frequently, construction projects aren't fast tracked
- Pretty slow process
- Been here 8 years, came off UCSD process, moves faster
- It's just different here
- We started to receive fair amount of complaints from faculty, staff, as well that had experienced conflicts with bikes
- Came under a fair amount of pressure a year ago, began to do an enforcement program
- We need to roll this out in a way that is purposeful, would begin in next academic year
- Still believe that that was best approach
- Also received complains from academic senate and board of academic senate
- They were also concerned about bicycles
- There was a consultant that was hired to investigate
- Also addressing the San Benito project and the impacts that would have on bike routes
- Putting a lot more people on paths on a campus that wasn't designed for that volume of people
- Seeing ebikes, skateboards, mechanized skateboards, etc
- Challenge has grown over last 5-7 years
- We started receiving complaints through chancellor's office as well as UC's Office
- When we broke for last academic year, this group was very active
- That's where we find ourselves today
- Next 2 people will be talking about our educational campaign
- Concept called three E's
- An engineering solution

- 2nd, education
- 3rd, Enforcement
- One thing we're responsive to are challenges of safety for the occupants of campus
- Regardless of who levels the complaint, we respond the same way
- Student affairs vice chancellor will come to podium
- Interim vice chancellor Mike Miller will also talk about their role in education campaign

Mike Miller (6:57PM)

- Student affairs is committed to safety and well being of students on campus
- Committed to education around bike safety and enforcement
- Education efforts we've launched have been in collab with UCPD colleagues
- Public affairs and communication, AS bike shop, AS bike committee, graduate division
- Will be brief in my remarks
- Essentially 5 different avenues of communication we've engaged in
- 1, social media content, currently in process of creating videos about enforcement, bike etiquette, law, mobility
- Will go out weekly throughout quarter
- Also have a web and online presence
- Throughout wellbeing.ucsb.edu handful of helpful hints
- Also in our inventory of communication and digital signage
- Through Storkie's digital daily
- Email and internal communication
- This last friday, email went out signed by us outlining the process
- Media and external outreach
- Partnering with multiple areas on campus
- Trying to get as much out of this as we can
- Look forward to any questions you all may have at the end

Chief Matthew Bly

- Desired outcome is changed behavior
- Lowering the probability of bicyclists interacting with pedestrians, i.e. bike collision
- Walkway that runs north south between education building, SSMS area, connects bike path to ICA
- 2 areas of focus
- Change in that behavior, voluntary compliance, reduced risk
- End state for UCPD perspective is to not have our officers go out there and write citations
- Enforcement might be an aspect to this campaign
- But we don't believe it'll be a permanent solution to this problem
- Hopefully creating safe avenue of travel for our community, whomever they area
- That's what we're trying to do, creating safe environments

- Trying our best to do that through education efforts over enforcement
- Leading up to present day, what everyone has seen is uniform police officers and the secondary concern SSMS building
- Back in May of 25, the community outreach team met with TPS to develop workflow resources and curriculum for Transportation and Parking Services, and led an online bicycle safety presentation.
- The reason that we did that gave us a specific vehicle 21 113 GE which gives to allegiance the University of California the right to pass rules regulations and laws specific to UCSB campus
- The violation that we're talking about here in question, as far as riding a bike on a walkway, it's 21-113G.009
- In order to handle these citations that have been written is an option for those recipients to either take an online class or pay a 40$ admin fee
- That’s a program we developed with TPS division
- In September of 2025, community outreach team met with ICA
- Our message to ICA was to please disseminate this message and have our student athletes lead by example
- Help them walk their bikes as they're connecting from the old pool bikeway or bikeway near lot 29 over to the ICA building,
- Or whether students are making their way to rec centers
- Mid September, informing them of education enforcement campaign
- September 18th, met with leadership, some of your executive members and again described this bicycle education enforcement campaign to AS leadership
- September 22nd, outreach team met with 100 freshmen associated with ICA delivering same message
- Also same day met with 800 promise scholars, high achieving, low income, underrepresented and talking with them about upcoming campaign
- Delivered it internally with student safety partners
- Embracing the concept that our community service organization, CSO, organization, which we have the SSPs working on behalf of UCPD
- Their role is to work as liaison between sworn officers and student body
- Disseminated this message to all of our SSPs and asked them to lead by example
- One of the things we did was extend an invitation from the AS bike committee to join UCPD officers in these two problem areas to talk to students, not from the lens of the police department, but from that AS bike committee, from their peers
- Last week, committee outreach team hosted first bike education community update meeting through zoom, open to public, weekly meeting, space to discuss campus wide education to share ideas, resources
- Again, how we can reach that desired outcome, voluntary compliance, changed behavior
- Some of the outreach UCPD has done present day
- When it comes to enforcement, know it has generated concerns
- Our education campaign started in mid September
- Prior to that we also had our comm outreach team and patrol supervisors conduct in field assessments

- Parts of assessments was to give recommendation and signage
- 14 new sandwich board style signs have been placed in those 2 areas on campus
- We receive feedback on how those signs might be improved
- Again open to receiving that feedback
- Those assessments began in late August
- We're also providing bicyclists with warnings and education
- Started September 15th, UCPD has provided 1,206 warnings to bicyclists for violating that warning
- Issued 4 citations
- Totality of our context, .003 of those are resulting in warnings
- We've been very focused in the education aspect of this
- Providing them with warnings instead of citations
- Bike crash data is of significance here
- Over the past 4 years, we've had a total of 83 collisions reported to UCPD on this campus, I'm alumni, spent 5 years on campus, what's being reported is that there's a lot of misses, collisions that don't result in injury don't get reported
- There's minor injury, major injury, some classified as a hit and run
- That's the data I have
- Those weekly meetings will continue
- Hosted by our outreach team
- BC Miller presented, been collabing with student affairs
- Our community outreach team is also going to be conducting we're called septet assessments
- So these are prime prevention for environmental design, health use areas on campus, and submit any of those recommendations for what they're worth to any kind of planning development efforts that go into addressing this public safety concern on a more permanent basis

MacPherson (7:13PM)

- We met a number of times on site, seeing and hearing collisions in front of us
- It's rare that so quickly you get in living color the exact reason you're standing out there
- We thank AS bikes for bringing it to our attention
- Chief indicated, our focus is addressing the matter of a more permanent solution
- Committed to finding solution, going to take some time
- Committed to bringing those solutions to campus

Chief Bly goes to stand for questioning at 7:15PM.

Luken

- Maybe share data with us so we can disseminate to student body
- The issue is optics
- Can you commit to returning to senate, yourself or other UCPD rep, the state of your enforcement campaigns, so we can communicate that to our constituents so that those optics aren't so harsh?

Bly

- Yes, absolutely, I'm committed to that

Pascher

- We spoke over zoom
- Echo same concerns of Luken
- Would be silly of me to say there's absolutely no public safety concern, stop ticketing
- Completely valid concern
- The approach you guys are taking is appreciated, however
- Asking that you confirm to us that we are in the education campaign
- There were citations that were written, I'd like you to speak about where and why those came

Bly

- Still in education phase of this campaign
- I am interim chief I am not stripping away my officers' integrity
- The fourth, unsure about circumstances, the first 3 is where officers are attempting to provide warning, they're being physically acknowledged, and their efforts are ignored or dismissed
- They're riding past them and then stopped by another police officer
- Not elevating to a 148 violation, but with a uniform officer conducting this type of education, there is a vehicle code violation here
- Officer does have suspicion for detection
- Trying to make this as consensual as possible, that's a 2 way street and we need it reciprocated
- If they're ignored and ridden past, the officer does have the discretion to issue for a violation

Malhis

- Very aware
- I'm a sophomore, I have myself been involved in almost 10 accidents
- Almost every single time, it was actually my fault
- The people on bikes are actually doing a really great job
- A lot of people now having bikes on campus are new to biking, being on lane with faster bikers is better
- Lots of grey areas
- You can actually see there's a right lane for bikes
- It was my fault
- Feel like embedding pedestrian awareness to education will be great

Bly

- I agree

- In our walkways intersection with bike lanes, they might not be aware we have robust biking community
- Maybe more signage or combining it would work as well
- Thanks for suggestion

Jiang
- The 4 ppl who got the citation, did they have the option to do the education instead of paying the time?

Bly
- Yes, currently an option to take the course, they have a 30 day period

Ly
- I believe that you've really emphasized, emphasize that this campaign is an educational campaign, but even in the email that was sent out to the student body, the title of email is bike safety and enforcement, and there was lack of communications with student body prior to police presidency on campus,
- Biggest concern
- Very needed
- I believe the communication to student body has not been best
- The email was after it started and students began seeing police presence
- Not communicated when there was any last year
- Also in email, emphasizing that it’s an educational campaign, but that’s not advertised in the email
- The educational aspect isn’t being communicated
- Don’t clearly list out what that’ll look like
- Voluntary compliance has not been advertised
- They're wondering, why don't we just create a bike path
- The weekly bike path comm update was only advertised to us, not student body
- Even on instagram, which has limited engagement, people are even saying why don't you create a bike path, where’s the bike path
- Which is something they’re working on, but it’s not advertised
- Seems like it’s UCPD vs students trying to get to class
- Communication to certain groups is much appreciated
- People that we communicated with, student athletes, around 1200 students out of 24k students
- Also 0.04 percent of our population aware of our bike population
- In terms of signage, signs don't emphasize educational aspect of it
- As student perspective, I just see signage, emails, police presence
- They are not emphasizing that UCPD is for the students
- Would be helpful to have more info on signage
- So that they know like we know that you guys aren't trying to penalize anyone

Bly
- Would like to collab with entire student body on the effort

- Hoping this group, AS leadership on campus, can help us disseminate that message, because we reach is far greater than ours to our student population
- I hear you that maybe our efforts to date have been inadequate to provide that education to our student population
- Def something we're interested in collabing with this group on

Ly
- Yeah, great if UCPD could work on better communication and optics

Bly
- Optics is definitely something we acknowledge and we're concerned about
- With public safety, whether it's this bike safety issue or crimes against persons
- Community safety takes a community to be involved in
- While we're a focal point of this campus, it takes the entire community to build this environment
- We're interested in clearly communicating it's not UCPD against the student body
- Trying to make campus safer for all folks

Wahidullah
- Two brief questions
- To hear an expansion of your efforts
- Want to hear more, if you've been participating or collabing on alternative safety policies
- 90% developmental stages coming towards bike path
- If you could assist, with the engineering components, with the data you guys have recently collected with the bike committee, or just any ways you guys have been assisting in those areas engineering
- Second question, have you been communicating with alternative groups on campus like marketing or outreach
- We have many resources
- I work in liaison committee
- As well as outreach
- Just wanted to hear if you have been communicating with other groups too regarding the educational advocacy

Bly
- Hope when BC miller comes we do more outreach
- We're certainly open to outreach team and collaborating with colleagues here
- Receiving access to promoting this message
- Fact is is that UCPD doesn't have robust social media campaign
- We don't have resources to adequately manage that
- If there's other social media groups
- Stakeholders we can collaborate wit h
- As far as data and engineering goes, things have been going on for months, any data that the campus needs regarding collision, data

- Important piece I didnt present, late september there was a four hour segment where officers were at ILP, they issued around 200 warnings
- Any data that UCPD can share, we'd be happy to share with any campus entity
- They'll be conducting crime prevention through environmental design
- They'd be happy to

Lala
- More follow up questions
- We spoke about an engineering solution, as the only route that makes sense
- I brought up that huge concern where where are the funds for these citations going
- Seems like they'd go to TPS
- Would you be willing to commit to allocating the funds towards a fund that would go to the bike path project?

Bly
- TPS are taking on additional tasks associated with this effort
- Especially in hypothetical scenario
- As far as processing of those scenarios, taking on additional duties from that department
- The goal here is to not generate a tremendous amount of citations and fines
- That's the goal here
- Our mission, to get voluntary compliance and behavior
- To answer your question directly, no I'd have no opposition

Lala
- Think it'd be a sound idea?

Bly
- Wouldn't be opposed to it
- Want to acknowledge that we don't have a TPS rep here with us

Lala
- Made clear is that goal is not to have an educational period and then go into enforcement
- The goal is to not need that enforcement campaign
- Once it runs up, this module option that's available to students, will that still be available after educational period is over

Bly
- It would still be available
- It's either or
- Actually 3 options within 30 day period
- Could take an online course, could pay the 40 dollar fee, or could choose to go to traffic court through 2 venues

- Could go in front of magistrate or wait until it gets sent back to UCPD to get sent back to traffic school

Lala
- Students report that crime hasn't decreased, hasn't followed trend of covid
- Fully sympathize from managerial perspective, neither fun nor best route to be allocating resources and manpower to man the ILP
- Wondering if there's a plan
- Short to medium term while you expect this campaign to roll out

Bly
- Resources needed are constantly evaluated by station commander, by the Isla Vista foot patrol, which is Lieutenant Joe Schmidt, as well as our liaison to the foot patrol, which is currently Acting Lieutenant Brad Pollard
- Those two are actively communicating about resources and staffing levels
- Concerning, over last weekend, where we've had serious assaults occur
- Understand the question in terms of is this the best use of UCPD
- Those activities in IV aren't overlapping with our staffing hours, 8am - 4pm monday through friday
- Some of this IV activity occur evening hours
- The MOU, the sheriff's office is responsible for 66% of staffings, UCPD's responsible for 34%
- Came up in conversation earlier today, brought it to light
- Def on radar, committed to offering up new resources
- If that's something that Schmidt and Pollard feel like they need to provide added leasing services in IVCSD as possible

Hepburn
- I was at a party where the stabbing occurred. Do you have any updates on that?

Bly
- Not in a position to provide update on that, contact Joe Schmidt

MacPherson at stand.

Claro (7:42PM)
- The combined presentation from Matthew Bly and vice chancellor and you, complete with history and stats from ILP is pretty impressive
- This info campaign, the fact that it has an educational phase, it's commendable to pedestrians
- Think that communication towards this education campaign has been lacking
- Think the fact that there is infrastructure for this plan for an education campaign is pretty nice

Luken

- Can you guys commit to providing this body regular updates on progress of bike path and development?

MacPherson
- Absolutely, when AS bikes come up to speak, they'll speak to the fact that we've been very effective about that from the very beginning
- From beginning, we've supported engineering solution
- Taking time on design
- How to pave it, will be up to budget office
- That's what we do, that our job is to communicate and do the things that you just requested

Pascher
- Want to hear more about experience at UCSD
- Disheartening to hear you think things move slower around here
- Like to objective about what we ask
- How can we keep things up and not have them be slow
- We would all love to have things get done faster
- That is a frustration and point of contention for myself
- If you could update on how UCSD is better than us

MacPherson
- It's the culture
- You could probably go to each of UC campuses and see different approaches to what we do
- In our case, the amount of development dictates generally how quick you can do it in future
- How many buildings have we built in last years
- When you look and compare that with other campuses
- If you drive by that campus on freeway, you see multiple highrises of student housing
- The pace is quick
- So is the funding
- Of the 10 campuses, roughly half of them have medical centers
- Ones that don't have slightly less or a great deal of funding
- Medical centers are coming under pressure from federal regulations, impacts, presidential executive orders
- Not quite as beneficial as it used to be
- But it still is
- Campuses generate through their schools of medicine
- SD has a great medical center
- Three hospitals in one building basically
- When you start your day with those kind of resources, you end your day with it

Pascher

- My grandma was treated at UCSD medical center, beautiful campus
- For myself as senator, can you point me in direction in how we can bring this to UCSB?

MacPherson
- The pro schools, medical, law are generally not the path that UCSB has traveled
- There's different levels of interest, neither right nor wrong
- Part of UC system does is that it's embraced differences of campuses
- Some effort to bring them a little closer together in terms of their approach, and in the recent year, but that was a good thing
- Think we should embrace differences
- Can't all be the same
- Resourcing is different
- Land is different
- Down in south, both slides of freeway, trolley trisects campus
- Allows people to live farther away
- Vast difference even from structure

Ono
- How big of a problem do we see funding for this problem being?
- We all know that there's a shortfall going on with all the federal cuts and whatnot, and the entire UC system is under threat
- Think we could put money together for this in a closer timeline?

MacPherson
- Don't have answer for you
- Were at point where we have documents we've talked about
- At that point, a bunch of us will have to take a look and see where we're at
- Thought that from beginning, hope our colleagues at AS bikes will provide that issue to y'all
- Matter of win, which is based on supply
- This is an important project
- Important that we treat it as such
- Commit to be an advocate as I have, for the advocating solutions

Ono
- Good because engineering solution seems to be best and only one
- Second question is about the when
- Hypothetically, if we had money and plans, given your experience, could you ballpark that?

MacPherson
- I don't know the scale
- That is what the project Josh is working on through the budget office is telling us
- From that, we'll generate cost

- Appreciate your question

Ono
- Glad that admin is also on board
- We might have been one of the early advocates of that

Sherkin
- As a biker myself I see what my colleagues have been talking about
- I feel that in this convo we've sparked, also started another opportunity for there to be constant communication with AS bikes, UCPD, from an education standpoint
- I want to ask in your opinion, do you think it's feasible for all the entities to always have this constant communication with each other and students?
- I believe that from my perspective, we went from using our bikes trying to get by to having all these enemies
- I think for the success and wellness of students this needs to be a consistent thing
- Even if we have a meeting that reports on things
- Think this is a long term thing

MacPherson
- I agree
- The police chief and I had a conversation about it last night
- Communication not being as good as it could be
- UCPD being repped in these meetings more regularly
- The answer is yes it is important and possible and we will do everything we can to make that happen

Wang
- Wanted to ask if you could consider something for your education campaign
- One thing is that many bikers come from san cat
- Because of distance
- This hall is also notorious for housing freshmen
- A directed effort to teach these students could be helpful
- This residence hall is very populace with 1700 students
- If you ever are wondering how do I reach so many students
- Just go to san cat
- Since these are the freshman they may grow to be examples for the future
- So that they don't have any of these problems anymore

MacPherson
- And so you're asking for my commitment there?
- The requests I'm hearing tonight aren't difficult
- Sometimes we forget and make mistakes
- When we know those, we will take the necessary routes

- When we know that we will take the first correction necessary to step forward

Sussman
- Lived in residence halls last year
- Did four meetings, in those it was educational info
- Is that an avenue that your committee or task force can do?

MacPherson
- Yeah in fact we talked about that over the summer, the different venues we can access to share the story
- That's probably one we didn't do as good of a job as we could have
- Our housing and dining population is pretty state of the art by comparison
- Mentioned were a little slow, our housing and dining operations are top of the heat of UC system
- They have always committed to sharing these bits of information
- Matter of hearing the desire to have that
- I can commit that they will view that
- You will have that communication with vice chancellor of housing and dining
- Remarkable man

Ono
- I was curious, would the UCSB Admin be amenable to committing to an infrastructure commission?
- And advertising that within safety campaign that's currently ongoing
- A lot more students would be amenable to this if university could commit to long term path
- Reassuring people that this is a temporary measure would go a long way

MacPherson
- I think that's right, when we started the campaign 3 years ago we always knew
- We always knew we needed 3 solutions
- Engineering, educational, enforcement
- We from the very beginning knew it was unlikely to get all the outcomes we all wanted
- Think even if you aren't a student of design, most aren't, you'll see the value
- I think you're gonna see the value of what's put in front of you very quickly

Rohmer takes a stand at 8:00PM.

Ono
- I have a question on the UCEN road, after the old path got raised
- School put in green markings on UCEN road
- Just wondering if school considered any other updates to UCEN road

Rohmer

- I wasn't here at that exact point
- I don’t know whether there are other solutions identified besides that
- Those were installed after routing to UCEN road

Jiang
- I just have a information inquiry
- People who are bad with directions
- Can you provide us with a diagram of the plan?

Rohmer
- Yeah I actually brought some copies
- Could you pass out that sheet?
- This is from the construction drawings I mentioned earlier
- Showing the overall part where the potential new bike path could go
- It starts right near music
- Where pardall bike path turns south
- Continue going east past that elbow, ILP and Davidson library
- If you want to see the more detailed plans I can share that with staff

Ly
- Is this project then able to be shared within the student body?

Rohmer
- In a month they will be more final

Jiang
- Would you guys be open to student suggestions
- If it was to a certain finalized version?

Rohmer
- Normally for any major construction project there is a planning committee
- That helps provide and involve faculty staff and student representation
- This process is moving different than normal
- At the point where it becomes a formal campus project,
- There definitely would be an oversight committee as the project is finalized

Manakova
- Addressing what Ono said
- Students feel uncomfortable biking next to cars, which is why they go through library
- I am looking at the trainings I haven't seen anything about biking next to cars
- I know that’s probably really scary for students

Rohmer
- Understood, pretty intense bike experience

- Everybody comments on the intense bike culture here
- Gotta admit it’s intimidating for first time bikes

Wahidulla

- Could you provide or expend information regarding, as you mentioned earlier in your conversation, that this project of the developmental stage is around 90%
- Obviously it's going to be quite multifaceted when it comes to on this particular engineering process and developmental stage
- But when this developmental conceptual stage is finalized, with this map, could you maybe expand information about the next upcoming particular steps regarding this engineering component, and maybe just some of the upcoming challenges in this particular project, and how maybe Associated Students with our resources can help?

Rohmer

- Good question
- Schedule is the question
- We do not have an identified funding source for this project
- One of the characteristics of my office, budget and planning
- We have 10 more things that we have the budget for, always
- We’re resources-constrained
- We do have whole tranches of capital needs on campus
- We have more students than we have in the past
- We have need for new academic buildings
- Needs for student, faculty and staff housing
- Most of these are relatively unfunded
- Funding is a big hurdle
- Recognizing this is important, important item for campus tuition
- If we had all the funding, I think a reasonable timeline would be
- A bidding process we have to go through immense amounts of hurdles, within a year we could have somebody under contract for a project
- Should take less than a year
- After funding occurs
- Identifying funding source, assessing costs, etc..

Lala

- Let's move swiftly to the bike committee
- I wanna say thank you for the presentation
- Bike committee has been leading this
- I suppose this is the question
- Would AS be a part of funding this in any way?
- When the funding will come does it seem clear when that might be the case of when we can get a clear funding estimate

Romer

- We just need to have construction drawings complete, then work with cost estimator

Lala

- Possibly within this year?

Romer

- Estimate for project cost? Yes

Associate Vice Chancellor Mike Miller takes stand.

Claro

- Has there been an addressment of the anxiety about possible federal enforcement on UCSB?
- Some are threatened more than others based on immigration status
- Has there been any correspondence between the santa barbara police department and or the SB sheriff's office in regards to
- Regarding coordinators with ICE, DHS, or more enforcement?

Chief Bly

- No

Miller

- Federal law enforcement activity is something we're monitoring
- Worked fiercely with other campus leadership
- To address those concerns right away
- Something we're paying very close attention to

Ly

- Will there be further efforts at the admin level in communicating with the student body?
- Would you be open to a shift messaging emphasizing educational aspect
- If there would be more transparent communication to the student body?

Miller

- Just started campaign
- Reminding everyone were just starting education campaign
- Would love to
- Been on campus for 23 years, biggest challenge is communicating to students
- In my role as interim vice chancellor, one of my main priorities is improving communication to students

- Looking at revamping our email system and working with other vice chancellor to revamp
- Gotten rid of D list announcements, you may have gotten some of those email correspondence
- Trying to revamp that entire process
- Whether that's social media, we've been struggling with it for long

Ono
- Would you guys publicly endorse on behalf of the university the long term
- The long term infrastructure solution of ILP bike path
- Is this more of a wait for a budget to come in and then we put in a plan?
- With students if the university is willing to commit to building the path
- Students are also more likely to accept the current interim enforcement measures and the citations that we have because we have some reassurance that the university is doing something to fix this long term
- In current stages, as student who's not involved
- It would go a long way if the school can publicly endorse a bike path

Miller
- In my role as vice chancellor of student affairs, absolutely
- I would absolutely endorse the rerouting of the bike path
- Obviously, things are outside of my control

Ono
- If there was a way for admin to come around to a commitment
- I think the student body would take it well

Chairship temporarily yielded to First Pro-Tempore Sussman 8:18PM.

A Bill to Clean Up Legal Code
Sussman - Pascher - Luken

Motion to move into Closed Session

Sussman

- I'm sure you've heard a lot about this bill. Thank you for giving me the opportunity to speak. I know we all love long speeches, so I promise to keep this one brief, or at least moderately digestible. I want to begin with a quote. “If the people do not trust their government to do the job for which it exists, to protect them and to promote their common welfare, all else is lost”-President Barack Obama. One of my favorite leaders, President Barack Obama reminds us that in governance, purpose comes from truly serving the public by making their lives easier and their futures brighter. That quote stuck with me this past summer as I found myself deep in the trenches of our Association's legal code, highlighting outdated sections, cross checking contradictory provisions, and wondering why we have positions which have not been filled since George H.W. Bush presidency. Coming in Associated Students like most of you, I knew that our Association's reputation on campus was not the most highly regarded, especially that of the Senate. Over the summer, somewhere between correcting typos, I had a realization, oddly enough, while watching John Green Crash Course history video about Thomas Jefferson in the early hours of the morning. That realization was that our association isn't trusted or recognized by the student body in the way that it should be. And it's not because we don't care or aren't trying. It's because we've been trying to do everything all at once in the middle of our governmental responsibilities. I think we sometimes forget we are also just students, some of us athletes, some of us club leaders, fashion lovers, student workers, scientists, activists, you guys name it. We're everything. We're human. And as elected officials, as an association, we have a limited capacity and simply cannot be all things to all people all the time. Nearly five months ago, we were elected to represent our peers, to amplify student voices and to make meaningful change, not to solve every problem in the world or build a government so complex that even we struggle to understand it. In our 76th year as an association, associated students have experienced tremendous growth, but in that growth, the association lost something, its focus. We spread ourselves too thin and have got entangled in solving interpersonal and international conflicts, created layers of bureaucracy without reason and written rules that let's be honest, no one follows because they are just too confusing to even read. This isn't about pointing fingers or criticizing the sentence that came before us. They did what they thought was best, but it is a reminder that, as legislators of an organization with a nearly $16 million budget, we have a lot of power, and if that power isn't regularly checked, refined or grounded in purpose, we lose sight of why we were elected in the first place. When governments lose focus and fail to reflect the advancement of thought, policy, technology and society at large, they lose the public's trust. We see it in state and national politics, and we've also seen it here at UCSB. So with all that context, that is why I'm bringing forward this bill. The bill to clean up legal code. This bill does what the title says. It simplifies, clarifies, and updates our governing documents. It removes dead weight roles that haven't been active in years, and overlapping duties that create unnecessary bureaucracy rather than serving students. It corrects errors, results in consistencies and eliminates sections that no longer serve any real function. It

removes about 80 pages of legal code. This makes our association more accessible, understandable and digestible to all students, something we pride ourselves on. This will also allow not only senators and Associated Students members to understand how we operate, but the whole campus, to understand the government that represents them, to understand why we pay the equivalent of $23 a week, and to connect with our association to understand the vitality and work we do as a government. The bill to clean up legal code also frees up nearly $40,000 on paper money that can be redirected from obsolete and unfilled positions to real student needs. This was done by simply removing outdated roles that had not been filled in years or, in some cases, ever. This is about progressive, sensible government that will enable us to undertake larger projects in the future, benefiting all students, not just those already involved in Associated Students. This wasn't done in a vacuum, though, there are many individuals who deserve recognition for their contributions to bringing this global life. During the summer, I met nearly every single week with our assistant director of government affairs, Holly, whose insight, patience and willingness to answer my 10,000 questions made this possible. I also consulted with executive director Sean Lieberman, Director of Finance and Budget, Michael Saya, Chief Compliance Officer, Vayne Versailles, second president pro tem port Holly Jones, internal vice president Lala and President Metzger, who I kindly who all kindly tolerated my constant breakagement of text. I apologize to you all, especially. Additionally, I would like to express my gratitude to my co authors, Senators Pascher and Luken. Without their detailed contributions and precise review of legal code, this vision would not have come to life in this project. I also worked with our executive officers and BCU chairs to ensure this process was thoughtful, transparent and collaborative to everyone who contributed, whether by updating the title of a position or helping to dissolve entire sections of code. Thank you. There are no surprises here. It's on a radio address. The bill is rooted in the same principles I ran my e campaign on, which is transparency and reform. The itemized list in front of you breaks down every major change. While it doesn't include every type of fix or semi colon adjustment, it gives you the full picture. Thank you for taking the time to read my materials, and thank you for showing up week after week to serve this campus. I'm proud to present this legislation as a step toward restoring confidence and faith within our association. This bill is not a solution to the many, many problems associated students are facing, but it aims to move us toward a better sense of clarity, accountability, and functionality. I hope this bill passes, not just because I wrote it, and not to just clean up our legal code, but to send a message to students, our community and our administration that Associated Students listens, adopts and is working for the students of UCSB. Thank you. I welcome your questions and your feedback

Pascher

- I was taken aback when I first looked at this document. I approached Senator Sussman and I said yeah I'll help you with the bill. I promise I'll get around to it. Week after week I kept forgetting to help this kid with the bill. I finally got around

to doing it towards the end of the summer. I finally found some time. I remember I was at my District Attorney internship and had nothing to do, and I pulled up the legal code bill and to my surprise, 500 pages had been gone over. Senator Sussman did this all by himself all summer. I really think that you guys should appreciate the overhaul and time that went into this. It's quite admirable. I could sit here and say I am proud of him. I know he holds this association's best interest in mind. It's prevalent in his work. Separately, I wanted to give some advice to my fellow senators about how to go about this bill. I spent the remainder of my summer going page by page on this bill. It is hefty. The checklist that Senator Sussman provided, I strongly urge you guys to go down this checklist, tear it to shreds, and bring it back to wherever this bill is referred to. You have to carve out some time to look at this. It is your duty as a senator to make sure any discrepancies you may have are heard. I think that Senator Sussman, Senator Luken, and I are confident that we will get this passed. I highly encourage all senators to attend the Liaison Committee meetings for the duration of this bill so we can work on it together. My flowers to Senator Sussman and congratulations on getting this on the floor.

Luken

- I was traveling Europe this summer. I was like I'm going to come home and fix up his bill, but he literally did it all himself. Unbelievable the work he has done. Super proud of him as a friend and wowed as a colleague. I want to emphasize the edits the bill makes are very largely nonpolitical. They are simply cleaning up legal code. There are changes that are made but they are largely nonpolitical ideas and wouldn't warrant a political discussion. It was more technical, structural changes, and that was my role as a philosophy major to give him the philosophical overview of how I'm seeing the changes he's making and keeping it strictly a clean up bill. It is phenomenal work and very happy this is getting presented

Wahidullah

- Overall, that was absolutely amazing. The checklist and everything was unbelievable. I already was involved in the particular process. I know Senator Luken mentioned how there should be no particular points of controversy. Maybe you could explain how some organizations will be affected by certain legislation codes, and maybe you could explain how you communicated to BCU's on what to remove and dissolve and that it is shared properly.

Sussman

- You'll notice there are different highlighted sections. The ones that are highlighted are simple resolutions of areas that have not functioned or been active. There is a counterargument: let's make them active. When I looked through legal code, I had a thought process of is this realistic? Are they going to benefit the student body if they are active? I also consulted with staff when I was looking at for instance, IV governance board or rally committee to ensure that was something agreeable. We didn't necessarily remove any active organizations. On the checklist, we are dissolving the Public Safety Commission, which was

dissolved already, we are simply just removing it from legal code. So it's all of these things that have either not been in good practice, don't function the way that they're supposed to be written, or we simply just don't need it as an association anymore, because we've evolved. It's the same thing with the Commission on Community Employment. I consulted with all the executives and had many meetings with President Metzger. It's been a cross collaboration process and nothing was a sole decision. It was a process of thinking about what doesn't need to be in legal code and what does, and seeing what best benefits the association.

Motion to refer a Bill to Clean Up Legal Code to Liaison committee
Than- Luken
Called to question- Chaudhry
This motion passed at 10:06PM.

Lala

- There is an argument to make that a bill of this magnitude and impact should go through several committees. It is not the most practical route.
- Not most practical route
- The plan I think there was some consensus behind, was letting Liaison committee have the bill for 3 weeks, and having an understanding that senators who have something to contribute come to Liaison do so in the proximity. That would give them 2 weeks to consider it all. Is that okay with everyone?

Claro

- With the consent of the chair,
- Giving policy 6 of Associated Students policy and procedures which recognizes spontaneous criteria. It must meet the following criteria: emergency situation,or if the issue falls within 10 days from the meeting at hand.

Lala

- Just motion it.

Motion to add A Resolution to Affirm Membership Rights in the Association under new business to the 10/8 agenda due to its urgent nature.
Claro- Pascher
Called to question- Chaudhry
This motion passed at 10:09PM.

Claro

- Friday October 3, 2025, ICE activity near UCSB spiked community fears. On October 2, 2025, an unconfirmed immigration agent attempted to identify a student by Santa Catalina residence hall. As the resolution highlights, decades of precedent exists from all levels of government, the federal, state, UC, regents and Associated Students policy. The new threat to student safety and to the equal protections of the law are merging due to the rampants of ICE on campus. These

fears are real, as an immigrant myself, if no concrete steps are taken, and mass hysteria continues, it stokes the fire of anxiety. Given the precedent that we are to follow the law, which is recognized under the state code to be protected and under Supreme Court Plyer. Unlike that of the federal government to address student rights and the community update on 10/8, the 76th senate has a responsibility to address the issue from the vice chancellor and local law enforcement, and the notice disseminated by the Dean of Students. Thus, I employ the senate to consider this motion.

Luken

- To address new developments regarding immigration services in and around our campus. I think it's relevant for the time period we are in and with the administration in Washington right now. I hope this gets the proper consideration it deserves

Lala

- My humble recommendation is that the advocacy committee makes the most sense because its charge includes that the committee will address concerns involving all university actions and that's the least heavily burdened committee.

Motion to refer a resolution to Motion to refer
A Resolution to Affirm Membership Rights in the Associationto
Pascher- Ono
Call to question- Ly
This motion passed at 10:12

Back at 10:36PM

Motion to go into closed session inviting all members of campus media and all members in UCEN flying room and the Associated Student MinuteTakers at 10:37PM.
Sussman-
Motion rescinded.

Luken

- Does the motion language need to say the reason?

Holly

- You have to explicitly mention them because without, it's just senators. When you exit a closed session, you want to explain a reason about what it was.

Motion to move into closed session inviting all AS Staff, all AS Minutemakers, and all Judicial Council Members at 10:39PM.
Sussman- Chaudhry
Called to question- Claro
Passed at 10:40PM

Moved out of closed session at 11:03

Motion to enter into record in accordance with the Brown Act that this closed session was held to discuss Finance Committee meeting minutes from October 6th

D) PUBLIC FORUM
[1:30]

Speaking agreements:
"You have three minutes to speak, with three minutes for Q&A. Please state your name, pronouns, and enunciate, but refrain from yelling. Speculation of a Senator's intentions is prohibited and may result in you being removed from the ability to speak on the floor. Please know this meeting is being recorded. You may speak on any issue, whether it is on the agenda or not. Please include a content warning if it will be graphic. You may only come up once, and you may choose not to answer questions."

1. Aryaman Singh (8:18PM)

Motion to extend the speakers time by 5 mins
Jones - Ono
Call to question - Wahidullah
This motion passed at 8:19PM

- I used to be a senator last year, and I was also the chair of finance last year. Now, before I start, have any of you ever worked before funding to the Finance Committee, or it was pretty intimidating, wouldn't you say? No, it's pretty complex out there. It's not like the information isn't out there. It's on some website somewhere. It's an illegal code, which is, like, 1000 pages long. But every day, as finance chair, I got the same exact question, what is a Requisition Part? Where do I submit? What do I fill out in this box over here? Now, you know, obviously I never minded doing that. It was my job, but I couldn't really get to everybody.
- There's so many people out there and so many people that don't even know that they can help them in so many ways, right? You know, like, for example, I debate club chair last year, Sussman. I saw you pretty often, and you guys went on trips for the debate club representing UCSB. And you guys are great. Now, many kids don't even know about that, that they can come to the finance committee or the Senate to ask for funds, or they can go to EOP to ask for money if they have some kind of situation, or they don't know about the rent Support Program finance committee.

- Now I basically built something that is like a chat GPT, but for AS if you ask a question, something like, where do I submit? A requisition form, it's going to tell you exactly what it is, right now, it's, it's basically like an automated FAQ
- You ask a real question, you know, which form do I submit? What's the policy on, let's say unreserved debts. And it will tell you exactly what it is. It is. It will appear fast and proceed. Now you might be wondering, don't AI chat AI models like hallucinate and stuff, right? And they definitely do that is a very, very big problem that many things face, but not this one. And the problems with that is the good thing, because that chat GPT and like, let's say Gemini, right? They are open ended. They don't really look through, they're scared to give you an answer. They're text predictors. They don't really know what they're talking about. They're just predicting what the next letter should be.
- This one is actually meant to look for the information. So when I was chair, I had this big, long document on Google Docs, which basically had all the information that anyone that works in assoc know, you know, whether that be the workflows that admin has, or who to contact when I, you know, need some help with this, or which part in legal code should I look for if I want something, some help with that.
- It was pretty helpful, but I can't just keep controlling F through my entire thing every time, right? And with Control F, if you don't know what you're looking for, Control F is not going to help you, and I'm sure most of you know that as well looking through the legal code.
- So yes, there's two ways it actually generates or not generates retrieved information. One is like just a Google Doc that I built, which has all the information that binance shared to know, and the bot can go through any of this information give you an answer within seconds, and you can also the good thing about it is that, since you guys are also switching to a cloud software platform pretty quickly, you can change what this says, despite typing it out and explaining to it what you mean, like, if I could share my screen right now, I would. Can I share my screen?
- If it doesn't know the answer, it will just tell you I don't know. And that's the good thing about this, you know, especially with AS where everything is so legal and everything is so serious. You don't want people turning in their acquisition columns wrong. You don't want people submitting some columns wrong. You don't want the wrong information and get out there
- . And that's why it's so good to have this kind of model which has a confidence score, which is derived from, like, similarities of it, turning literal text into a number so we can understand what you're saying, kind of like how we do, where we focus on, just like simple keywords and when people speak to try and understand what they're saying, the model kind of does the same thing

Motion to extend speaker's time by 3 minutes.
Wahidullah- Than

Call to question- Ono
This motion passed at 8:26PM.

- so you can see the screen over there. Pretty simple question, where do I submit requisition forms? Or you can send them an email by assoc, what is a requisition form?
- It gives you all the information. And like I said, it's very simple to just go change something and say if I want to change where requisitions if I submit
- So I just really wanted to let you guys know what I've been working on over the summer . I'm sure I've shown this to Sean and Michael as well. They seem pretty satisfied with it. I hope, as you can see, the new question, the new response was playing student response, Student Resource building instead of the Multicultural Center that didn't take that long chain at all.
- And you can also scope our legal code or your legal code and financial policy and answer questions directly from it as well. And also return the page number if you're looking for that too. So right now, it's obviously still in beta testing. If anyone wants to work with this on me they want to test it out, just send me your email. Send me an email.

Ono
- Later in our meeting we are doing a lot of legal code changes
- It should be very simple but it should be very simple

Malhis
- This AI doesn't hallucinate
- When it says I don't know, would it at least provide some recommendation of who to contact?

Singh
- If its something about recommendation then it would say idk but u cant contect sebastian or michael

Pascher
- Just want to say thank you for working on that during the summer and thank you for your service

2. Eemaan Wahidullah —Basic Needs Office (8:30)
- I'm one of the current 76 associate senators, as well as a third year double major in biology, political science. But I wanted to share quickly, a little bit briefly. I'm speaking independently from my role as assistant students on campus senator, but as a student coordinator working with the basic needs Senator's stuff. First, in general, I send this particular Dockerfile to the IVP. But first, UCSB Center has

requested that they are interested in collaboration with the Associated Students body and all of AS leadership to possibly take around maybe five minutes of your time to complete this particular poll, or why you sent to the following entities and stuff that overall, the goal is to schedule a joint meeting between the basic needs center and alongside associate students leadership to discuss overall, how we can better address campus wide basic need issues together.

- It is known that both of us entities collectively are interested in basic need initiatives. But from experiences last year as a senator, as well as from a particular components that I believe that decentralization in itself is a very key component towards failure of a lot of amazing ideas of particular projects and beyond, speaking from the easy Committee, which is why it's always a typical passion of mine to use existing platforms to work together, and which is why I wanted to share that in particular and what that afterwards of the Senator's meeting, that this particular phone call can be shared between Senators who are interested in collective basic need initiatives to work with us in the next upcoming particular weeks.
- And second, the basic me center is also asking that we share their particular weekly basic needs newsletter, which is across AS communication channels, including our email list and our outreach pages. So a lot of you guys with your current, existing resources and students and leaders can continue to stay informed about our career resources. At the basic needs center it provides for more events, our resources and just a lot of professional opportunities that maybe some particular ideas that Senator's might be currently having, that already existing and existing programs and basically centers, I think, that expand on and participate in
- . And typically, these newsletters go out every Wednesday or so. It can be coordinated through either Holly or any particular staff to help, additionally, to add these to our mass training, but um, as well, for a lot to just kind of extend that information to everybody and stuff. But that's all I really wanted to say, just from being independent to the basic researcher, and really looking forward to communicating with the Senator's, I've been communicating to them about how a lot of you guys are very eager to work on these initiatives.

Speaker

- And I was just wondering, from an advocacy committee perspective, and I know you're speaking independent of your role as a senator, but I asked you to study my terms of how can as the committee, best best support the basic needs office.

Wahidullah

- No, that's a good question. And I have been having already ongoing communication talks with the advocacy committee that one of the things I already mentioned about the decentralization is a bit of a huge issue for us in the basic needs center, because a lot of and we will be, typically coming, and it will be a yearly will be really good ideas that already exist in the basic needs programs, and typically our subtitle, he has like either bi weekly or monthly, difficult

meetings of the holistic community of many stakeholders that are involved with basically these particular consultants.
- So it just requested some generals to extend themselves as either participant collaborated in our meeting. So I've already mentioned to you before that I have the advocacy committee or any Senators who are interested to come to these your host basic meet events with all the stakeholders in UCSB campus wide, and come continue to participate in those. You can learn news to send those projects and just come to those meetings when we have, like, our roundtable and talks with one another that would be really appreciative to see, like, what is actually needing help with and what is actually not really needed as much of an effective help with.

Lee
- I was wondering if basic needs any, like specific initiatives that they wanted to work with.

Wahidullah
- That's a good question. I'm right now. Difficult things I had in mind that they had mentioned about that, like, obviously regarding other things when it comes to food, equity needs and housing policy, right now that there are some multiple projects you are working on.
- One I am particularly working on because of the current federal budget cuts happening with some basic need programs. One is like the transportation services that are happening right now that they are receiving budget cuts currently, at the moment, as well as some food empathy program
- We're looking for some ways to figure out how to publish a moving process to go out with the student body currently, instead of having, you know, rapid housing emergency programs, that's something that has been tried before, but wasn't as successful.
- So it would be great if we had some more existing particular pilot program for housing needs that if Senator's going to help provide your insight to that, like helping the students moving over the summer and things like that, as well as this one immediate launch

Unanimous consent to move into action items G 8:37PM

Crystal Gonzalez 8:53PM
- I'm here speaking independently on the topic of the hours being cut for the library. So I just want to have breakfast. I might like I might lack some knowledge on some topics, but I'm just here to give a student perspective on it
- So I am in my first year. I have been here for a total of three weeks, but I have already noticed that this is a problem affecting a large number of students and just the general community. So when it was introduced, the time that all the dinners are out must be 10pm and then it was like after hours for students until 1am.

- That itself is very confusing. And as someone who went on a guided tour earlier this year, the library was emphasized as one of, like, the primary resources of this campus, and it was, like, really highlighted as the center with all these amazing features. And you know already instinctively, it's the kind of people who think of it as a safe zone, right?
- It's kind of dangerous to just be looking out in the middle of nowhere, finding a random table to do your homework, you trust in the library, you trust that there's heating and trust that you'll be safe there. And I experienced this myself a couple of days ago. This past Friday, I had to move from floor 4 number four to number two because of the changing hours, and that was really confusing, and I had a deadline to meet, so that was a bit of an inconvenience.
- But then also, by the time I got out with this morning, on my way back to the dorms, I noticed that there were a couple of students outside, and they were with their bodies and belongings, just like huddle upside of buildings for their surviving and just like, on a human perspective, I don't think that should be happening on campus, especially those who may be facing housing insecurity when there's a resource like the library right there, and considering that other UC campuses have multiple libraries. It doesn't make sense to shut down the only one that is our campus office.

Pascher

- Thank you for coming in. I really do appreciate it. As somebody that has been working on this at first, tirelessly, I found out it means a lot to hear from students and to know that what I'm working towards and what my fellow Senator's been working towards is actually important. So I guess what I can do for you here is kind of give you an update on where this is that tomorrow we meet with the Chancellor's Vice Chancellor's Vice Chancellor's meeting Affairs, who was here, whom you saw speak, and also, thank you, by the way, Maria and myself for waiting this long to speak in public forum. I know it's not ideal, it's not this late meeting, but we did have some matters to take care of. So I wanted to thank you for staying, sticking around.
- But as far as what we have been doing, I've pulled some pretty late nights and deliberated with my colleagues on what to do about this issue. We have a plan. We've had contact with the library. We've been working with the library, you know, thrown around some offers, and we're kind of just waiting on their response, and based on that, we will act. So I do appreciate you coming forward. I think the best way for you to see our position is, I believe,as UCSB Instagram is probably most accessible to you.
- There is a letter that we sent to the Vice Chancellor, and a resolution was passed according to our position of late night study. It's at least my goal to ensure that this is brought back. Initially, our goal was to flatten back, which is explaining for me, and I understand your frustrations, but if you have any questions and you would like to know some direct updates feel free to reach out to me by email.

Luken

- Thank you so much for coming. I know it's intimidating to come up, especially as a first year like so many. Props to you, because I still get intimidated talking most. I really appreciate you voicing your concern. To reinforce what Senator Pascher was just saying, tomorrow's meeting with the chancellor is our efforts to bring back late night study. So it is our goal that within the next couple of weeks, we at least have a plan for how late night study is going to return to address concerns of the many students that are on campus, exactly like you, exactly like me, who are worried about this. So thank you for bringing this to us, and your concerns are heard and being worked on.

Crystal

- Just hope this is something that comes in discussion

Reconvened at 918

Lala

- We are nowhere near on track to finish by 11pm

E) Acceptance of Agenda

Moved here at 11:13PM

Motion to accept the 10/8 agenda
Sussman- Chaudhry
Called to question- Ly
This motion has passed at 11:14PM

F) Consent Calendar

G) Action Items

Motion to excuse Sherkin for the duration of the meeting.
Manakova- Sussman
Call to question - Jones
This motion passed at 8:37PM.

Moved back here at 10:13PM.

A Resolution to Establish the First-Gen and BIPOC Peer Mentor Advocacy Program (...

Reported out of Liaison Committee as amended

Wahidullah - Ola-Olaitan

Pascher

- What was amended? Was it switched from a bill to a resolution? I don’t see specific amendments in Liaison minutes.

Wahidullah
- Senator Than can talk about the minutes, but I can extend on that in particular. The objective was just reestablishing it to be a resolution instead of a bill. A majority of the logistical stuff, BCU wise and pilot program wise, is all clarified.

Pascher
- I am a little frustrated that I cannot see what was amended. I don't believe that there is something under the table happening but it is very concerning to me that I can’t see what was amended. What is the point of this coming out of the committee if I can’t see what is happening.

Luken
- I concur. I think we need to have some sort of procedural way, whether it's a committee or if they put their amendments in a different color. I think that is something that needs to be reaffirmed going forward.

Jones
- I expressed the same concern as well. I actually had to ask when I received the legislation back what the amendments were. Typically they are supposed to be in red, and if something is changed, it is supposed to be struck through and red. So if u guys all still agree that's a good way moving forward we can keep that, or we can put this into consideration as well.

Lala
- Would it be okay with the first and second if we table this until next week and by then we have a document ready to be viewed by all senators of what the resolution originally looked like? Is that possible or is all the work done on this one document?

Wahidullah
- We simply added it on the document itself. Just to clarify, the majority of the editing was the title

Than
- That's my bad. I apologize, this was before us talking about how meeting minutes would look. I didn’t want to adjust the meeting minutes post meeting because that would be a breach of policy.

Lala
- Yeah that is much appreciated. It seems that there are 3 edits on this thing. Maybe that is only counting suggestions and comments and not only things you crossed out. I am going through the editing history of the document.

Than
- Are you referring to the resolution or the meeting minutes?

Lala

- The resolution.

Than

- I can’t even see it because I don’t have editing.

Claro

- Point of information. Is this a bill or a directional resolution? It says a bill on the explanation.

Lala

- Are we cool with tabling this to the senate floor for next week? Senator Wahidullah or one of the authors shares access to the senate email so everyone can see the editing history. We will just take that as the one off that changes to legislation are not recorded in minutes. That is the only time it is accepted. Then, when we come to the senate floor next week, we can make the changes.

Motion to table A Resolution to Establish the First-Gen and BIPOC Peer Mentor Advocacy Program(P-MAP) to next senate meeting, 10/15/2025.
Pascher- Chaudhry
Call to question- Ly
This motion passed at 10:19PM.

The Legislative Tracker Act Referred out of Liaison Committee
Harter - Wahidullah

Wahidullah

- There wasn't really any changes more of logical error
- That one can be passed today
- It came back without amendments

Motion to vote onn ˆ
Sussman-
Motion rescinded

Motion to amend the agenda under Item G Action Items the legislative tracker act to remove the words as amended following the words “liaison committee”
Sussman- Ono
Called to question- chaudhry
This motion has passed at 10:21PM

Motion to vote on the legislative tracker act referred out of Liaison Committee
Sussman- Ono
Called to question- Chaudhry
Handvote:
Yes- 19
No - 0
Abstain-1
This motion has passed at 10:23PM

Ly
- Point of information
- Would it not be a motion to pass. And then when we get to it, we vote by handvote?

Lala
- That was my understanding but that was not made clear

Motion to handvote on the passing of legislative tracker act
Sussman- Ono
Called to question- wahidullah
Handvote:
Yes- 19
No- 0
Abstain- 1
This motion has passed at 10:26pm

A Resolution to Establish the Language Revitalization Grant Program (LRGP)

Motion to table a Resolution to Establish the Language Revitalization Grant Program at UCSB until the next senate meeting until October 15, 2025
Ono- Sussman
Called to question- Chaudhry

Malhis
- Objection
- Why can't we discuss this a little bit further
- We all have the duty to stay here and discuss this further and we can come to a conclusion a little bit
- I think the author of this bill would like to talk about it

Lala

- As i understood it, this is being referred to next week because we don't have the amendments are

Malhis
- Let's get the clarification of it

Objection not rescinded
Second not rescinded

Vote to vote
Yes- 10
No- 5
Abstain- 2
This motion passed at 10:32PM.

Holly
- Anyone that vote yes that means u want to proceed to a handvote
- If you vote no, you want to go back into discussion on the motion
- If whoever made the motion wants to rescind it, that is different

Lala
- Are we all clear

Pascher
- Can u please repeat

Lala
- If you vote yes we move to hand vote on passing this

Luken
- Point of information
- That vote yes, is to table it, not to pass the motion

Lala
- Malhis wants to go back to discussion and first and second want to table to next week
- The first and second want to refer this to next week

Lala
- Changes to policy procedure

Malhis
- This was a vote to vote
- And now we move into a vote

Lala
- You are right right

Ono
- This is the vote on the motion to table

Pascher
- Point of information. The previous bill that was tabled is unable to be edited
- So well have to open it

Lala
- You should have all amendments ready to just show us
- no w were going to a hand vote on the original motion

Motion to handvote on the passing of legislative tracker act
Sussman- Ono
Called to question- wahidullah
Handvote on previous motion
Yes: 12
No: 2
Abstain: 5
This motion passed at 10:35PM.

Unanimous consent to move to action items at 10:37PM

G-2) Old Business
[Debate Time Per Item- 15 Minutes]

H) Recess

Entering recess at 8:59PM to come back at 9:14PM.

Report Speaking Agreement: Pursuant to Senate Standing Rules Section F, clause 5, officers of the Association providing reports, must take questions from Senators relevant to the matter(s) or project(s) presented. Knowing that, do you still wish to give a report?

I-3) Unit Reports [Speaking time not to exceed 10 minutes] -

1. AS Bike Committee

Anthony Wu
- A co-chair of AS Bike Committee
- Recent UCPD bike enforcement efforts

- Prepared this today before everyone spoke, might be repeats
- I want to reiterate our mission, which is first and foremost to promote bicycle infrastructure on campus.
- Committee's top priority has been restoring the bike path
- Actively in process of making the bike path happen
- Any day now or as Rohmer said, sometime next few months, expect final construction plans and cost estimates
- Will be completed by Stantec civil engineers and true landscape design
- Final challenge will be securing funding, maybe biggest way AS can help us
- We want to spread the word that the path is coming soon
- General student population is unaware of bike path's plan
- Increases frustration
- After agreeing last year to the bike paths return campus admin still felt that something needed to be done to address the danger posed by so many bikers riding off the path in the area
- Put together engineering, education, enforcement committee which included everyone that already spoke
- Bike committee main task is publishing TSA style videos
- To promote bike path etiquette and safety
- With intention of reducing number of bikers around area
- We don't have enough of a following to make that big of an impact on the norms
- Something I know a lot of people have expressed a want for
- Told that the orientation agenda is locked down on what it already has
- Other solutions we explored
- A trial run of adding traffic cones to block hashed area
- Those cones were there for just a few hours one day
- But when we tried, bikers just evaded the cones
- Clear that due to widespread feeling that there should be a path, it was going to be difficult without a path
- Last spring after having exhausted many avenues for bike safety
- Want to say although bike committee was part of these deliberations, our only main contribution to this effort was we created an initial draft of the slides module
- We did not make the final decision on resulting ticketing
- We created the initial draft as the slides module for giving the alternative to paying the fine
- We believe that this was the best way to ease the financial burden on students and redirect the effort on education
- Like many who pointed out, a lot of people don't seem to be aware that the fine is payable
- Hope that knowledge of this eases people's concerns about whole situation
- Issued over 1200 verbal warnings, only 4 actual citations
- Dont think process for module has begun yet
- Would like to address the fines themselves, they are not a profit of any kind
- The money goes to TPS, not UCPD

- Money from tickets isn't expected to exceed resources that TPS spends
- Also to address something earlier, there was a request that the money from the tickets goes towards then building of the bike path
- The bike committee is actually against accepting money from tickets
- Introduces a conflict of interest
- Don't want budget to be increased
- Just doesn't fit with our mission
- Additionally because this effort is operating at a loss for TPS
- Keeping the funds going towards them ensures they'll be able to keep module program going, necessary part of this enforcement effort
- I hope the info I provided eases some concerns
- Main thing I want people to take away is that bike path is coming back, only safe solution, until that happens, been a difficult question on how to improve safety and etiquette
- No one saw policing as the first solution to this
- More of a last resort
- Everyone involved is open to other solutions
  Nike committee gave wishlist on what we knew we wanted to have
- T intersections and four ways just don't work for bikes
- Roundabout on east side is going to cut a bit into parking behind ILP, most of the time that parking lot is less than half full
- What's great is that it doesn't narrow
- Does not narrow the walking path at all
- Bike path will run through the plantar, vegetated area
- Permeable surface for this is drainwater, stormwater, surface lost through paving will be made up through areas in middle of roundabouts which will have grass or other landscaping
- Were waiting for the official construction documents

Ono

- I just wanna say senate really looks forward to working with bike committee on these issues
- Nice to have a path forward
- Want to thank you for being involved
- You have this in depth info for us
- Best thing we can do is just communicate to student body that things are happening
- Best path forward, it's getting done

Wu

- Tried to release statements
- We've tried to sort of put the message out there
- Don't really have outreach capability

Luken

- Wanted to offer
- We have a lot of channels by which we're going to send info out to student body this year
- You mentioned the module that students can complete instead of 40$
- You’re trying to get that info out
  Would love to get that out, have a chat with you about how we can do that

Wahidullah
- Chair of liaison committee
- Do have many resources we can help expend and integrate

Jiang
- I believe I have knowledge that outreach committee is doing class presentation under our officers
- I think it might be a good source to include that info
- Do you poster flyers our distributive things at the AS bike shop

Wu
- Don't know about bike shop, they're a separate entity within AS
- One of the mechanics is on the committee so were trying to increase our collaboration
- Trying to increase collaboration
- Hoping they can be one of the efforts

Jiang
- It could be possible that you give people a flyer every time they visit bike shop

Wu
- I will relay that to bike shop

Ly
- I was wondering what the best way for senators to assist you on the bike committee?

Wu
- Funding
- Abstract discussion right now
- Outreach, getting the word out to the whole students body
- Reasons people are so upset about ticketing is that they don't know the bike path is coming
- Increasing awareness would help
- One more thing, you have the wrong email for us on one of the email lists

Sean Lieberman

- Holly and I can change that for you

Motion to unanimously consent to move into item D public forum.
Passed via unanimous consent at 8:53PM.

I-4) President's Cabinet Report -
- I don't have a report to give, but I can answer questions

I-5) Executive Director's Report -

Sean
- Stork tower and our kcsb building are actually on the radar of campus friendly for repair. So they're looking at some repairs of our own right now, as of issues with the rain and coming through the roof, basically, of kcsb, so fixes are in place for that within the next month, I would hope that stork tower and and everything else. That's a different, a different piece. So if any of you have billionaire friends, please raise each other. And we've been bringing in the tower elections as the gun meeting. And just be good. I do a lot of election stuff. Wanted to let you know that they're I came directly from that meeting, actually, and so they're discussing the party system. So just start thinking about that as it applies to any of you, because that was a constitutional amendment that passed in the spring it was operating.
- . So I'm guessing most of you weren't and nothing around when the party system existed. So if you have any questions for that, let's see marketing. Our storky fee mascot, which you've probably seen around, is available for our as groups. So if you're also part of an AS group, or you know, there's gonna be some tabling, there's something where you need a giant mascot to dance around. We got you.
- And then finally, there's just something that's in progress, and it's not even my project at all. I just want people to be aware of it. It kind of ties into basic needs. A little bit is that there's a project called the Student Success and this is student affairs is working on this. I believe maybe it's even more with its moment, but it is a Salesforce based solution, so that data about students is tied together in a way that you can communicate it better. So let's say someone has a certain level of financial aid, maybe that triggers something, and we can reach out from the food bank and say, Hey, you have this additional need. We also need this without relying on them. Having to come to us, is the idea.
- So it's maintenance of data at the back end, so that we have more integration and cooperation with data on campus, because most things are not like community

Luken
- For the storkie mascot
- Who do we contact of that

Lieberman
- The media center

Luken
- Do we pay for hours

Lieberman

- No we are still working that out, but no

Jiang

- For people who fill out the docusign early on
- It's very possible that you receive approval but they don't have a record in office

Lala

- For advisors, should all centers add one specific name or does it not matter

Lieberman

- Holly, Marissa and I are all on there

Malhis

- They said they didn't have a record of my Docusign. And not only that, I actually had a key, and I was directed by everyone to refill out this film. When my key was working, I just had an issue with one specific room, and I indicated that. Then they proceeded to say they forgot about that, apparently. And when I filled it out, the docusign asked me to forward it to them easily
- But I wish there was someone on the first day initially came in who actually looked through my issue, like I came in person and maybe saw

Holly Advisor Report October 8th, 2025 Week Two

- I can just share with all of you to just look at the email with the document with updates I have given. Considering time, I can just open for questions if anyone has any. I don't have anything else urgent to add

Lala

- It's also on the agenda

Pascher

- Can you briefly give the main points of that report? It doesn't have to be in depth just what you think is important for us to know.

Holly

- Yes, of course. One thing at the top that I shared, is just a friendly reminder to use slack or email as the primary communication method for staff. I myself have given many of you my cell phone number, and that is totally fine, so I am not pointing that out for anyone, but for anyone that's reached out to any of our other staff. Many of them don't like using their personal phones and receiving texts after hours. So in the cases where it's been offered explicitly, you're welcome to continue that communication. Otherwise, if we could forward that to those work channels, that would be really helpful. Another thing is, I'm looking to offer some training to you all, specifically on the legal code process and on drafting legislation. So if any of you have any suggestions for other topics you'd like me to offer you all, please reach out to me and let me know. And also wanted to share with you all that I will be giving regular feedback to you all that I hear from

advisors about different legislation, and I've asked them all that, if they feel comfortable, to reach out to you all. I know that the Liaison Committee is really spearheading this work and relationship between the Senate and between staff, but would love it if you all could be receptive to talking with them outside of the Liaison Committee as well. Those are mostly the highlights. If there's anything that you need from me at any point, I'm very open to communication and feedback, and would love to hear questions or suggestions for training or if there's any other project support that you need.

Wahidullah

- Thank you for giving clarity on the relations among staff and the student body. I have already communicated a little bit to you before about promoting staff events to collaborate with the student body. I kind of have already stated this to you before, but can you also just explain more about some of the existing meetings that you have weekly and the process to join those meetings as well?

Holly

- Yes, absolutely. Every other Monday we have our AS managers meeting and I shared it with you all.
- You should ask us to be invited to that though because sometimes we discuss more confidential department things, and sometimes we don't and are open to that invitation. Otherwise we have staff meetings every other Thursday. So the week that we are currently in, there is a manager meeting and a staff meeting. You are welcome to attend those and listen, or if you want to be added to the agenda, feel free to do that as well. We have advisors meetings every other Thursday. The advisor staff groups, as the name indicates, is staff that advise entities. So I've invited some of you already to attend some of those. If you have not been invited and you would like to be, we would be happy to have you there, either to listen in on meetings, or to ask questions to the advisors. Those are the meetings where we kind of talk about different legislation that's happening at the Senate, things going on in financial affairs, and we talk about the challenges that advisors are having or workshopping through training to all students. We also share ideas for different advising needs and things like that. If there are other team meetings you want to be invited to, reach out and I can connect you.

Ly

- Do you mind adding those meeting times to the sheet President Metzger handed out? The contacts and meeting time sheet?

Holly

- Yes, I can do that absolutely

Than

- Can you address any updates to staff advisors? There are ongoing concerns about staff advisors with BCUs such as Black Women's Health Collective, IAC, and I understand that Take Back the Night got a new staff advisor.. Can we just get updates on that for the Liaison Committee to update our research pages?

Holly

- I believe we're pretty close to having the final list approved, but I will also leave it to Sean to address any staffing plans. I don't want to speak on any specifics. We have a current list that I believe is up to date and I can share with the Liaison Committee, but it seems like some staffing proposals will include some positions that will cover that. We both have some information now about what is current for the advising, and also more information to come when we send you the staffing plans.
-

I-6) Executive Officers' Report -

1. External Vice President of Statewide Affairs Leiya Kadah Oseinou

- We are going to talk about the meal reform video we just shot. Thank you so much for the video and the time. It was about the new reform of meal plans. You can donate them through the food bank and you can have 3 unused rollovers every week and up to 5 guest passes. That video is an example of what your senate spotlight would look like. I will be sending out an email later this week regarding an introductory form and information regarding scheduling and senate spotlights and topics you want to pick for it regarding legislation and what you do in Associated Students. It will have an excel sheet. You have to do it yourself, sorry. Regarding your portraits, that is also on your introduction form. It is going to be 3 senators a week. I was thinking of doing a theme, but that's too much. It is just going to be like who you are, and your specificity. It will all be in the instructions. Basically look for an email, do the introduction form, and schedule your video. Please do it.

I-7) Senator Representative Reports -
I-8) Administrative Reports -
J) Committee Report -
J-1) Standing Committee on Finance -
J-2) Standing Committee on Outreach -
Luken

- Our events team is working on a pumpkin patch type of event. We saw the program board do something like that. Was anyone there? We'll touch on that later. We'd like any other senators interested to reach out to me and Senator Hepburn about that. Also, this is outreach in the form of communication. This is something I am trying to communicate to my committee as well. Whenever you ask a question, whether it be interpersonal conversation or in public forums, it is very important and looks good for the body when you are able to think through what you want to say and keep it concise and direct. Sometimes we stumble around the point, and it's something we have to work on or every human being can work on. I think it's especially important to work on as elected officials that

we keep that at the forefront of our mind that good communication is concise and to the point.

J-3) Standing Committee on Liaison - Liaison Committee Report 10/8
Wahidullah

- we haven't necessarily done as much particular ongoing projects, more of like discussing future ongoing projects, but the talent of it we've been working on over this recorder, just one of our goals instructors. We're still continuing doing, obviously, the missions of bridge, of BCUs, missing a body to help us continuously do the more allocation, transparency and consistency, through a lot of more operational support
- I've been working on this particular on just like outlining for our committee members and stuff that I've seen successful modeling and other volunteer organizations that I'm in that I want to help, just now to train a lot of our particular committee members about what assoc students is
- I'm trying to give them more accountability and transparency, but giving them weekly, on a weekly basis, more associates of the task, and giving them more assoc products, to give them more accountability, to continue doing projects instead of means, and again, doing most of the work sometimes so and then regarding some words out and some of the centers I could highlight, the better towards this. B
- ut when it comes to all of our summer work, in regards to governance and legal code, particularly, legal code particular things and association and have been working out of it all looks essentially leading with the part of the audience board regarding their overall drafts to be completed, as well as program board in particular, with their legal updates beyond just ready for Senate referral.
- And then now, when it comes to financial staff affairs, some of our particular committee members, again, Senator Than, can come discuss a little bit about the server, are kind of discussing about some things regarding towards petitioning, towards staff transparency that has been just overall circulated to help improve communication between student government and staff, just promoting, again, for the staff quality that also be good as well for some particular staff members.
- And noticing, as was mentioned, I think, I believe, a couple of meetings ago that a lot of, typically, there's a lot of issues when it comes to the AS main front desk staffing gaps, when it comes to like, particularly people not being there. So we're counting some ongoing solutions to help support this particular problem. And just briefly on some events and projects we're working on some of our committee members
- And as well as more collaborations, which I'll be talking about in a second at the outreach committee on some particular things, are working to help reinvigorate the AS marketplace, to help them do some reasonability towards the BCUs and

their marketing and promotion, as well as on the smaller content, media content to help just promote existing staff events instead of creating new ones.
- I don't know if you guys know about it, but Claire particularly, working on is that every Monday we actually have AS study hours, typically from the mornings and stuff. But it's not really as much media content for that. So that's a really good idea, an example of us doing more into collaboration between leads and the average committee to make more content and help promote existing music events.
- But I'm speaking about our media and outreach. I've been particularly working with the average committee and going to their meetings the past few weeks just to weeks, just to Sussman a bit about creating a joint concept pipeline between the average committee and the media center, and just all of our typical content ideas that we want to be starting to just kind of share in a little process with our committee and stuff like for multiple ideas, and just noticing for some recent events and stuff for accountability and communication that we've noticed when It comes to just really stress the last minute absences.
- We're just still finalizing some of the summer work when it comes to legal code and appointments. But overall, we're working on this fall quarter for just more event planning, now that we have a good foundational structure of the laser committee, and compared to last year, going to be now looking at more creativity components side of making more events and more particular projects with that too.

Than

- With the legal code stuff we have been polishing several BCU codes
- With regards to Sussman legal code edit, we might have to go back and edit some as seen
- It is important we make sure BCUS utilize the vent tracker
- We would like the BCUs to utilize it so if you interact with the chairs, send it their way
- Three people are doing a pumpkin patch idea
- Finally, I've been working internally on staff things particularly that the organizational structure of staff is bad and that you have to rely on 3 people, marissa, holly, sean
- Problems of communication and trouble with staff understanding what senators are doing
- There's big communication issue

J-4) Standing Committee on Advocacy -

Speaker

- real quick everyone tomorrow, we have our first, like, in person advocacy committee meeting tomorrow, and it's gonna be a pretty important one. We're gonna discuss, like, finalizing the projects that we're gonna do, and especially, I'll say the ones involving federal agencies on campus.

Lala

- Let's move into appointments. There are two, one very long, one normal motion to make onto appointments. So essentially, these are kind of the last things we need to deal with, from what was very complicated, not exactly fun to handle, and liaison actually won't need you guys help on this kind of resolve itself, thankfully.
- But these are the last retroactive appointments that I've committed for fall 2024 and I've checked and this is just the best route to go, and the honorary committee will consider them next week when it convenes. And essentially the difference here is the deadlines of appoint retroactively was on either August 1 of this year, and that's going to be enforced strictly. But these are cases in which there was an actual appointment issue, like, it's not the fault of the person who did not receive it. So that's why there has to be a very long motion made. We add them on to appointments, we approve all appointments, and then we go to new business, and then the closed session. Does this sound all right

Unanimous consent to move into appointments and resignations at 9:45PM

J-5) Group Project and other Temporary Committee Reports-

K) Minutes and Allocations:

To Be Approved

Motion to open the 10.06.2025 finance committee meeting minutes
Sussman- Wang
